21	This is hard there is a wide variety of things that I like to do and I have no idea which one I want to spend the rest of my life doing. If I had to guess for sure though I see myself as a magazine editor or working as a medical assistant. I see myself as a magazine editor because I like artsy things and English so it would be fun to give a magazine the best look it could have. If I was to be in the medical field it would be because I absolutely love to help people. Medicine really interest me because there is so much out there that can change the world and people's life with disease and I want to be a part of that.	10/28/2014 11:54 AM

23	The career field I plan on going into is technology. I want to go into the field of computers. I see myself there because I own a computer and that's what interest me, because there is so much you can do, and I wan't to keep up with the technology.	10/28/2014 11:53 AM
24	5 years from now I hopefully see myself graduated from college with a decent job. I hope to go to college and become an electrical engineer. 25	Actor. I do know for certain though since it is a very competitive career and is most times for people just a dream. I feel I can be an actor but there's still some insecurity about not being as good as someone else.	10/28/2014 11:52 AM
26	I'll probably have a low paying job somewhere in the community. Either paying towards training or just trying to survive. I'm not sure where my future is going but I need to figure it out soon.	10/28/2014 11:51 AM
27	I know that I want to do something with electronics. There's going to be a lot of jobs involving electronics so it won't be too difficult finding a job in that field. I see myself with an electronics job because I'm already taking electronics in ctc and I like it so far.	10/28/2014 11:51 AM
28	In about 5 years from now i see my self fresh out of the military. I see myself working in the field of construction. This is because this is what my education is going to be biased on. Also my training will be biased on this career path.	10/28/2014 11:50 AM

33	Welder and or Fabricator. I say this because welding is a fun career for me, I like to read blue prints, and I like to put the things together. It also helps that most welding jobs will start you out a a decent rate per hour(\$17) and once you're hired in you get more and you'll get their health care benefits also	10/28/2014 11:45 AM
